ACKNOWLEDGEMENT

A project is not complete if one fails to acknowledge all who have been instrumental in the successful completion of the project. If words were to be the symbol of undiluted feelings and token of gratitude, then let the words play the heralding role of expressing my gratitude.

First of all, I thank the **"God Almighty"** for his immense grace and blessings in my life and at each stage of this project.

I express my sincere and profound gratitude to **Rev.Fr.Dr.Jose Thurackal CMI**, Principal, Santhigiri College of Computer Sciences, Vazhithala for providing all the facilities during the period of the project.

I extend my gratitude to **Mr. Gibin George**, Head of the Department of MCA, who is a constant source of inspiration and whose advice helped me to complete this project successfully.

I express my deep sense of gratitude to my project guide, **Mr. Rajesh AV** Assistant Professor, Department of MCA, for his profound guidance for the successful completion of this project.

I was grateful to all the members of PROGRESSIVE SOFTWARE SOLUTIONS AND TRAINING for their kind support and suggestion during all the development stages.

With great enthusiasm I express my gratitude to all the faculty members of Department of Computer Science for their timely help and support.

Finally, I express my deep appreciation to all my friends and family members for the moral support and encouragement they have given to complete this project successfully.

Table of Contents

Chapter 1 Introduction 1
1.1 Introduction 1
1.2 Problem Statements 2
1.3 Scope and Relevance of The Project 2
1.4 Objectives 2
Chapter 2 System Analysis 3
2.1 Introduction 3
2.2 Existing System 3
2.2.1 Limitation of Existing System 4
2.3 Proposed System 4
2.3.1 Advantages of The Proposed System 7
2.4 Feasibility Study 8
2.4.1 Technical Feasibility 8
2.4.2 Operational Feasibility 9
2.4.2 Economic Feasibility 9
2.5 Software Engineering Paradigm Applied 10
Chapter 3 System Design 12
3.1 Introduction 12
3.2 Database Design 13
3.2.1 Entity Relationship Model.. 13
3.2.2 Table Structure 18
3.3 Object Oriented Design 47
3.3.1 Use Case Diagram 47
3.3.2 Activity Diagram 48
3.3.3 Sequence Diagram 53
3.4 Modular Design 56
3.4.1 Modules Description 57
3.5 Input Design 57
3.6 Output Design 58
Chapter 4 System Environment 60
4.1 Introduction 60
4.2 Software Requirement Specification 60

4.3 Hardware Requirement Specification 64
4.4 Tools, Platforms 65
4.4.1 Front End Tool 65
4.4.1.1 HTML,CSS 65
4.4.2 Back End Tool 66
4.4.2.1 ASP.NET,C# 66
4.4.3 Database 67
4.4.3.1 MICROSOFT SQL SERVER 2014 67
4.4.4 Development Tool 68
4.4.4.1 VISUAL STUDIO 2012 68
4.4.5 Operating System 69
Chapter 5 System Implementation 71
5.1 Introduction 71
5.2 Coding 71
5.2.1 Coding Standards 72
5.2.2 Sample Codes 72
5.2.3 Code Validation & Optimization 81
5.3 Debugging 82

ABSTRACT

Pineapple Farm Management System (PFMS) is an innovative digital platform designed to streamline the pineapple supply chain by facilitating direct transactions between farmers and agencies while also providing access to essential resources such as fertilizers and tools. The system aims to address key challenges faced by pineapple farmers, including inefficient trade practices, lack of access to reliable markets, and difficulties in sourcing agricultural inputs.

PFMS enables farmers to showcase their produce and negotiate fair prices with agencies directly through an intuitive online interface. By eliminating intermediaries, farmers can secure better prices for their pineapples while agencies gain access to high-quality produce from reliable sources. The platform incorporates features such as secure payment gateways to ensure transparency and efficiency in transactions.

In addition to facilitating trade, PFMS serves as a comprehensive resource hub for farmers, offering a wide range of fertilizers and tools sourced from verified suppliers. Farmers can browse through product catalogs, compare prices, and place orders seamlessly, saving time and effort in sourcing essential agricultural inputs.

Overall, Pineapple Farm Management System represents a significant step towards modernizing the pineapple farming industry, empowering farmers with greater market access and resource management capabilities. By harnessing the power of technology, PFMS aims to enhance productivity, profitability, and sustainability across the pineapple value chain.
